ABOUT ME

Aspiring Computer Engineer with a strong foundation in full-stack development and artificial intelligence. Currently gaining professional experience in .NET and C# environments, while actively developing projects using Laravel, React, and Tailwind CSS. My academic background includes specialized research on Deepfake Detection using PyTorch and MesoNet. I am a solution-oriented developer with a proven track record of creating practical tools, such as an AI Context Generator and POS systems, aimed at enhancing productivity and operational efficiency.

EDUCATION AND TRAINING

Computer Engineer

Kütahya Dumlupınar University <https://dpu.edu.tr/>

City: Kütahya | Country: Türkiye | Field(s) of study: Engineering, manufacturing and construction: • *Engineering and engineering trades not further defined* | Level in EQF: EQF level 6

WORK EXPERIENCE

PİTECHSOFT YAZILIM TEKNOLOJİ DANIŞMANLIK EĞİTİM VE TİCARET LİMİTED ŞİRKETİ

City: Kütahya | Country: Türkiye

[30/06/2025 – 10/08/2025]

Software developer

- Developing and maintaining backend services using **.NET** and **C#**, adhering to enterprise-level software architecture.
- Analyzing and debugging **Tenant Management Service** projects to ensure system stability and performance.
- Working with **MongoDB** for efficient data handling and integration within the company's proprietary service ecosystem.
- Developed a custom **AI Context Generator** tool using Windows Forms (C#) to automate project structure analysis for large language models, improving development workflow.
- Utilizing and analyzing internal **NuGet packages** to maintain modularity and consistency across different company services.

PROJECTS

Personal Portfolio Website

Designed and developed a fully responsive personal portfolio website using **React 19**, **Vite**, and **Tailwind CSS v4**. Implemented a multi-language system (TR/EN) via React Context

API, dynamic project filtering with category tabs, an interactive project detail modal with image galleries and lightbox preview, and a contact form integrated with **Web3Forms**. Deployed on **Netlify**.

Cafe Point-of-Sale (POS) System

Developed a comprehensive cafe management system using **.NET 8** and **Tailwind CSS**. Designed for **Intranet** deployment to ensure local network security and speed. Key features include real-time order tracking with **JavaScript**, split payment integration (cash/card), and a live kitchen monitoring screen.

Veterinary Stock & User Management System

Built a web-based inventory tracking application using **Laravel** and **Tailwind CSS**. Implemented a secure authentication system featuring an **admin approval workflow** for new user registrations to ensure data integrity. Developed modules for stock tracking, medical record management, and automated low-stock alerts.

AI Context Generator Tool

Developed a **C# Windows Forms** application designed to streamline the interaction between developers and LLMs. The tool automatically analyzes a software project's folder structure and source code, consolidating it into a single, optimized text file for context-aware AI analysis.

RushWordReader - RSVP-Based Speed Reading Tool

Developed a productivity tool based on the **RSVP (Rapid Serial Visual Presentation)** method to enhance reading speed and focus. The application processes text input and displays words at a user-defined speed, minimizing eye movement and increasing cognitive processing. Built with a focus on UI/UX simplicity and efficient string parsing, providing a practical solution for fast-paced content consumption.

Web-Based Interactive Family Tree

Designed and developed a dynamic, visual family tree application using **React** and **Tailwind CSS**. Focused on creating a highly responsive and intuitive UI/UX, allowing users to navigate complex familial relationships through an interactive graphical interface.

SOCIAL AND POLITICAL ACTIVITIES

Team Member & Developer - DUSCART (TEKNOFEST Efficiency Challenge & Robotaxi)
Kocaeli/Bilişim Vadisi

- Actively participated in **TEKNOFEST Efficiency Challenge Electric Vehicle** and **Robotaxi-Autonomous Vehicle** competitions as a member of the **DUSCART** team.
- Contributed to the design and development of vehicle control systems and autonomous navigation logic.

- Qualified as a **National Finalist** for two consecutive years, successfully passing all technical inspections and reporting stages.
- Gained hands-on experience in multidisciplinary teamwork, real-time problem solving, and engineering project management under competitive conditions.

SKILLS

.NET 8 | C# | PHP | Laravel | React | Tailwind CSS v4 | JavaScript | MongoDB | PyTorch | Visual Studio Code | Unity 3D | MySQL | Python

LANGUAGE SKILLS

Mother tongue(s): Turkish

Other language(s):

English

LISTENING B1 **READING** B2 **WRITING** B2

SPOKEN PRODUCTION B2 **SPOKEN INTERACTION** B2

Levels: A1 and A2: Basic user; B1 and B2: Independent user; C1 and C2: Proficient user

DRIVING LICENCE

Cars: B
